# Caixin BBD China New Economy Index

Released: 10:00 am Beijing Time July-02-2023

#### Overview

In June 2023, the Caixin BBD New Economy Index (NEI) reading came in at 28.2, indicating that the new economy accounted for 28.2% of overall economic input activities that month, down 1.9 ppts from May 2023 (Chart 1). After the outbreak of COVID-19 in early 2020, NEI kept going up for several consecutive months. However, with the post pandemic economic recovery triggered in the second quarter of 2020, the old economy showed stronger growth, suppressing the new economy. NEI has rebounded since 2021, fluctuating around 30%.

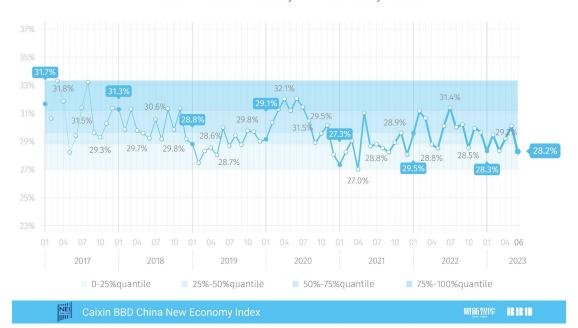

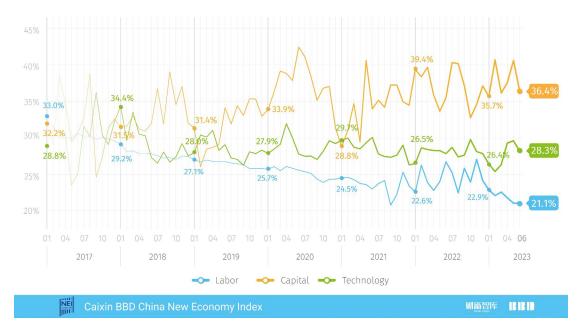

Chart 1: China Monthly New Economy Index

The NEI includes labor, capital, and technology inputs that account for 40%, 35% and 25% of the total weights of the index, respectively. The decreasing NEI was attributed to the decreases in capital input and technology input. Capital input came in at 36.4, with 4.3 MoM decrease. Technology input index came in at 28.3 this month, with 1.4 MoM decrease. Labor input index came in at 21.1, with 0.1 MoM decrease (Chart 2). Taking the weights into account, percentage changes in labor, capital and technology inputs were 0.0, -1.5, and -0.3 ppts, respectively. The net NEI change was approximately -1.9 ppts in total.

Chart 2: NEI Primary Input Index

The capital input index is composites of four sub-indicators: the ratio of venture capital in new economy industries, the ratio of invitation for bid in new economy industries, the ratio of capitalization of enterprises applying for the "New Three Board" in new economy industries, and scale of new enterprises in new economy industries. This month, the ratio of venture capital in new economy industries decreased significantly, which accounted for the major decrease in NEI.

### New Economy Sector

New economy is defined as following: 1) human capital intensive, technology intensive and capital light, 2) sustainable rapid growth, and 3) in line with the strategic new industries defined by the government. New economy covers 10 categories (Energy Conservation & Environmental Protection, New IT, Biotech, Advanced Equipment Manufacturing, New Energy, Advanced Materials, New Energy Vehicles, Science Research and Hi-tech Services, Finance & Legal Services, Culture, Sports & Entertainment) and 145 sub-industries. Please refer to our previous reports (March 2016 and March 2017) for the list of NEI sectors.

As for sectors, the New IT industry contributed 9.1 ppts to New Economy Index, accounting for the largest proportion of the New Economy Index (Chart 3). The New Energy industry significantly decreased this month, with 1.3 ppts decrease. Detailed data indicated that, the decrease of the New Energy industry was due to the decrease of the venture capital ratio.
